Wily Technology Engages Wayfinder Response Marketing for Introscope 7® Launch.

CA's Wily Introscope 7 Delivers Unprecedented Control of Web Applications

Wayfinder Response Marketing announced today an engagement with CA's Wily Technology division to announce the availability of Introscope 7®, the industry's most advanced solution for monitoring and optimizing the performance of business-critical web applications. Introscope 7 includes a new highly scalable architecture to help manage the world's largest and most complex deployments of web applications, intelligent automation to enhance usability, and the industry's most comprehensive visibility into transactions and business processes for rapid problem resolution.

Wayfinder was chosen to create integrated direct response campaigns to inform current Wily customers and prospects of the availability of Introscope 7. The campaigns are intended to migrate existing customers from previous product version to Introscope 7, and create qualified prospect leads.

For more information on Wayfinder Response Marketing, contact Louis Briones at 415.277.6961.
